

PHẠM DUY KHANG

Frontend Developer

📍 HCM city ✉ phankd1212@gmail.com ☎ 0941223216 🌐 <https://portfolio-khangpd.netlify.app>

SUMMARY

- **Frontend Developer with 4 years** of experience building scalable enterprise and healthcare systems (HIS, ERP, CRM).
- Frontend Developer experienced in technical stack decision-making, UI/UX thinking.
- Collaborate closely with Designers, BAs, and Backend teams to define user-centric business logic.
- **Seeking to grow into a Senior Frontend**, while being flexible to **expand into a Full-stack role** based on company needs.

SKILLS

Frontend: ReactJS, Nextjs, Typescript, Javascript (ES6), HTML, CSS, React-query, Zustand, Redux-Toolkit, React-hook-form, TailwindCSS, Shadcn

Backend: Nestjs, PostgreSQL, Firebase

Architecture & Testing: Micro Frontend Architecture, Monorepo, Gitflow, UI/UX principles

Tools: Github, RESTful APIs.
AI augmented development (Cursor, Claude, OpenCode).
Agent/Skill/Rule/MCP tools implementation for engineering.

English language: Able to read and listening technical documentation English.

WORK EXPERIENCE

CTMedtech

6/2024 - 4/2026

Frontend Developer

- **Core Platform & HIS Development:** Developed and optimized user interfaces for HIS v2 (Hospital Information System) using **Next.js, Zustand, RHF, React-Query, and Tailwind CSS, Shadcn** to streamline patient check-in, medical record management, and eye examination workflows.
- **Dynamic Form Architecture:** Designed and structured dynamic, flexible medical forms capable of adapting seamlessly to changing clinical rules and evolving requirements.
- **IoT & System Integration:** Solved slow clinical workflows by integrating IoT devices to automatically collect ophthalmic examination data, reducing manual input errors.

- **Impact:** Successfully deployed the system to 2 clinics, cutting patient examination time by 15 minutes, reducing manual workload for receptionists, and improving overall patient flow during peak hours.

Tera Solutions

05/2023 - 04/2024

Frontend Developer

- **Reusable Design Language System (DLS):** Proposed and built a centralized Design Language System from scratch using **ReactJS, TailwindCSS, and TypeScript**. Solved advanced issues including Tailwind merging customization, horizontal scrolling behavior, and versioned distribution for internal teams. Automated project bundling into ZIP files using Gulp/Rollup within 3 days.
- **Enterprise CRM Modules:** Implemented advanced features for Lead and Contact management, enabling sales teams to effectively track customer interactions and analyze sales performance.
- **Team Collaboration & Code Quality:** Collaborated closely with senior developers to maintain HRM and internal DLS codebases. Self-assessed task difficulties using story points, took full responsibility for deliverables, and **achieved "Potential Employee" recognition**.
- **Micro-Frontend Architecture:** Researched and implemented **Micro-Frontend** architecture using ModuleFederationPlugin in Webpack within 1 week. Structured monorepo workspaces using **Yarn Workspaces** over a 2-week period.
- **Techstack:** Reactjs, React-query, React-Hook-Form, Tailwindcss, Typescript.
- **Impact:** Improved development speed and UI consistency across the entire company ecosystem.

Innotech Vietnam

03/2022 - 03/2023

Frontend Developer

- **Core HRM Platform Development:** Developed comprehensive modules for Human Resource Management (HRM) and Cloud Admin platforms, including employee records management, leave tracking, performance evaluations, and payroll.
- **API Integration & State Management:** Integrated complex RESTful APIs utilizing Redux-toolkit to handle state management across large-scale modules.
- **Compatibility & Optimization:** Researched and fixed email template management features, ensuring UI compatibility across diverse mail applications (Outlook, Gmail) and devices within a strict 1-month sprint.
- **Tech Stack:** ReactJS, Ant Design, Redux-Toolkit, TypeScript, Styled-components.

Squademy (Personal Project)

03/2025 - Present

Fullstack Developer

- **Product Architecture & Planning:** Designed and developed a scalable fullstack learning/community platform from scratch, including product requirement documentation (PRD), feature stories, and system architecture using AI-assisted workflows with OpenCode agents and BMAD open-source methodologies.

- **Monorepo & Developer Experience:** Structured the project using Turborepo and Yarn Workspaces to manage scalable frontend/backend applications and shared packages with optimized developer workflows and build pipelines.
- **Frontend Development:** Built highly responsive and reusable UI components using **Nextjs, TypeScript, Shadcn, React-query, Zustand** with a focus on maintainability and component-driven architecture.
- **Backend & Database Engineering:** Developed RESTful APIs and a secure authentication system with **NestJS**. Structured scalable database schemas using **PostgreSQL and Prisma ORM**.
- **Clean Code & Optimization:** Focused on clean architecture, role-based access control (RBAC), and optimization to elevate developer experience and maintainability.
- **DevOps & Deployment:** Configured build pipelines, database migration workflows, and deployment processes using **Turborepo scripts and Fly.io infrastructure**.
- **GitHub:** <https://github.com/khangpd1212/squademy>

EDUCATION

FPT Polytechnic College

2019 - 2021

Graduated with Good Degree in Website Programming
